

Posting for update posted 24 February 2009

As some of you know, I suffered a major computer failure at the end of 2008. This failure resulted in my losing all of my genealogy data collected over many years. I did have most of it on a hard copy and have spent the past couple of months re-entering the data on the Zachariah Ratliff lineage. At the same time I also attempted to update those items of which I had knowledge. However, I would welcome your review of your lineage and letting me know what needs to be changed or corrected.

One of the major additional items you should notice is the addition of the counties to much of the data. This county information may be helpful to many who wish to look in those counties for documents and other information. You won't find county information in all data but I have attempted to provide it where I could.

The information on the other lines of William & Susannah Thomas Curtis Ratliff (William, James, John, Robert & Thomas) will be made throughout this year with the James lineage the next project. Please keep sending your information to me where you have the information.
